

FAT GONE IN 4 HOURS

Q. I hear there is a clinic in Kansas City offering a new type of liposuction where you get the fat sucked out. Then walk out 4 hours later. Please tell me about this procedure. I am tired of hating my body!

A. Midwest Medical Aesthetics is the exclusive provider of the tumescent liposuction and Cool Lipo procedures.

This procedure differs from traditional liposuction in that you have no downtime (you walk into the operating room and walk out and are fully awake during the entire procedure). Local vs. general anesthesia is used. There is minimal swelling with virtually no bruising, no blood loss. Only your fat is gone. You wear a compression garment for only about 48 hours. It is less expensive than traditional liposuction. No anesthesia charges and no hospital charges! With no general anesthesia and blood loss, we have significantly reduced the risk.

Small to larger volumes of fat can be taken out, depending on the person's size and desire. Two areas can be treated simultaneously with no downtime.

The Cool Lipo Laser is used in areas that are smaller and that you also want to tighten. We can tighten without removing any fat also! After your initial surgery, additional areas can be lipo'd a month later! Remember, no downtime!

This procedure is revolutionary in the Kansas City area. No longer do you need to take extended time off work for surgery. In just 4 hours we can change your body and you are up and walking right after surgery. We want you to continue to walk. You may feel some soreness after 24 hours but pain medication is unnecessary. **YOU WILL BE BACK TO WORK THE NEXT DAY.**

For over 10 years MMAC has introduced state of art procedures to make you look your best. Call us today to schedule your free consultation and don't waste one more day hating your body. Get it changed in 4 hours! Call 913-327-7175 today!
